Adrian Jesus Mora

adrmora2020@gmail.com| 401-595-9567 | www.linkedin.com/in/adrian-mora-038631293 | Cranston, RI

PROFESSIONAL SUMMARY

Computer Science student at the University of Rhode Island pursuing a master's in Cyber Security, with hands-on experience in full-stack development, automation, cybersecurity, Linux, and cloud infrastructure. Built and deployed production systems used by small businesses and nonprofits, including payroll automation, secure self-hosted infrastructure, and AI-powered tools.

EDUCATION

University of Rhode Island, Kingston, RI — May 2027

Bachelor of Science in Computer Science (ABET Accredited) / Minor in Data Science

Accelerated B.S. to Professional Science Master's (PSM) in Cyber Security — *May 2028*

TECHNICAL SKILLS

Python, JavaScript, C++, SQL, HTML/CSS, MATLAB, FastAPI, React, Vite, Playwright, Docker, PostgreSQL, Firebase, Git/GitHub, Linux, Tailscale, Cloudflare, Railway, Vercel, Wireshark, Kali Linux, Claude/OpenAI APIs, Stripe, Gmail API, English/Spanish

FEATURED PROJECTS & PRODUCTS

Business Automation & Client Portal Platform – Full-Stack Web Application — December 2025 - Present

- Live: https://professionalmultiservicesinc.com/
- Built a bilingual payroll and client portal that organizes employee hours, client information, payroll reports, and weekly submissions for 13+ companies and 125+ employees, replacing a mostly manual process with a centralized system.
- Automated payroll entry with Python and Playwright. But when the payroll provider's bot protection prevented the automation from running reliably on cloud servers, I moved the worker onto my own local infrastructure, allowing it to run 24/7 without additional hosting costs while keeping full control.
- Reduced weekly payroll processing time by roughly 80%, making payroll significantly easier for the business owner while giving clients a cleaner way to submit hours, access information, and stay organized.
- Tech: Python, FastAPI, JavaScript, HTML/CSS, Playwright, PostgreSQL, SQLAlchemy, Claude/OpenAI Vision, Gmail API, Docker, Railway, Cloudflare

MiCasaTV — Private Media Streaming Portal — Spring 2026 – Present

- Built a 24/7 self-hosted media and services platform on a home rack server, running Jellyfin alongside photo storage, home automation, monitoring, network services, and other applications through Linux and Docker.
- Designed a secure setup with no home-router ports forwarded, routing all public traffic through a VPS and Tailscale, keeping my home IP private while the platform stays reachable for everyone using it.
- Created MiCasaTV as an alternative to relying on multiple paid streaming services, building one private media library that I can manage myself and share with friends and family for movies, shows, music, and personal media.
- Tech: Python, FastAPI, JavaScript, HTML/CSS, PostgreSQL, SQLAlchemy, Docker, systemd, Jellyfin, Cloudflare Tunnel, Tailscale, PWA / Service Workers, Ubuntu/Linux

SipSmarter – Full-Stack Mobile App (Scrum Master) — Fall 2025 – Present

- Live: https://sip-smart-h9ad1f.flutterflow.app/initialScreen
- Led a 5-member development team as Scrum Master, executing 6+ agile sprints, managing GitHub workflows and while overseeing UI/UX testing and version control merges for smooth team collaboration.
- Built a full-stack AI mobile app using FlutterFlow and Firebase that helps users make smarter drinking decisions through real-time data analysis and personalized machine learning insights.
- Tech: FlutterFlow, Firebase, Git/GitHub, AI Integration, UI/UX

Sandwich Party Sunday — Nonprofit Website — Summer 2026 - Present

- Live: https://www.sandwichpartysundayri.com/ | GitHub: github.com/AdrMora2020/sandwichpartysundayri
- Designed and launched a website for a Providence nonprofit to help build its online presence, explain its mission, and give supporters an easy way to donate through Stripe.
- Built the site with React and Vite and integrated Stripe-hosted donations, giving supporters a simple way to contribute while keeping payment processing outside of the website itself.
- Tech: React, Vite, Framer Motion, Stripe, GitHub, Vercel

Valentina La Fritura — Small Business Website — Summer 2026 - Present

- Live: https://valentinalafritura.com/
- Rebuilt an outdated restaurant website into a modern bilingual English/Spanish experience showcasing its menu, story, and Dominican identity.

- Developed the site with React and Vite, featuring a custom scroll-driven entrance, responsive design, and online ordering integrations.
- Gave the restaurant a professional online presence that makes it easier for customers to discover the business, explore the menu, and order online.
- Tech: React, Vite, JavaScript, HTML/CSS, Cloudflare

Coronary Artery Disease Risk Prediction (MATLAB) Summer - 2025

- Built and trained machine learning models in MATLAB using the WiDS 2021 healthcare dataset to predict coronary artery disease risk factors, reaching 85% classification accuracy.
- Tech: MATLAB, Machine Learning, Data Analysis, Predictive Modeling

RELEVANT PROFESSIONAL EXPERIENCE

Web Developer & Payroll Associate / Professional Multiservices - Providence, Rhode Island 2023 - Present

- Manage weekly payroll for multiple small-business clients while building and maintaining the company's payroll automation and client portal, and turning other day-to-day payroll problems into software used by the business.
- Provide day-to-day IT support by troubleshooting software, computers, office systems, and helping with technology upgrades.

Life Sciences Externship – Courage Builder / NEMIC Summer 2025

- Applied AI and predictive modeling in healthcare to support ICU patients at a rural hospital.
- Collaborated with a team of students and mentors from NEMIC and SeaAhead, presenting findings on AI-driven solutions for medical technology and patient outcome improvements.

Technology & Innovation Externship /Tribe Academy - Dartmouth, Mass March 2024

- Led a team of 5 to develop a blue economy proposal, presenting recommendations to industry leaders from Jaia Robotics, Infused Innovations, and UMass Dartmouth School for Marine Science SMAST.
- Engaged in AI, cybersecurity, and blue tech workshop, building industry connections with Jaia Robotics and CiC Providence.

AFFILIATIONS

URI Cyber Club February 2025 - Present

Society Of Hispanic Professional Engineers (SHPE) October 2024 - Present

Brothers On a New Direction (BOND) January 2023 – Present
